OfficeConnect™ MiCollab

Keeping Employees Productive and Connected with a Consistent Business Communications Experience On-The-Go

MiCollab is a flexible and collaborative application that provides your employees with effortless business communications across any device. Accessed via a mobile, web or desktop client, employees are equipped with advanced productivity tools including file sharing, chat, conferencing, presence, video and voice, capabilities. Designed to supercharge team interactions from anywhere, MiCollab breaks down the barriers of a traditional workforce environment and improves overall company productivity through more advanced collaboration.

Key Benefits:

- Enjoy an in-office experience from anywhere, on any device with a mobile first design
- Spend more time engaged in productive communications with colleagues
- Boost the sharing of knowledge and ideas across business silos
- Extend the power of teamwork beyond the walls of an office space
- Avoid project delays and meet deadlines with more efficient employee collaboration

A Single Communications Experience on Multiple Devices

With MiCollab, employees are empowered with a consistent and mirror communications experience across all their favorite devices. Stop a conversation on one device and pick it up on another whether you're in the office, at home or on the road. MiCollab is available via a web client, a desktop client for PC and MAC, and is supported on BlackBerry, Android and iPhone mobile devices.
