

UniVoIP App

Unified Communications & Collaboration

With The UniVoIP App, our customers experience total VoIP phone system functionality through the mobile or desktop interface.

UniVoIP App's intuitive and user-friendly design provides for easy management of business communication on up to 4 devices including desktops, laptops, tablets, and smartphones.

Leveraging the UniVoIP App, all outgoing and incoming calls on the user's mobile device utilize and display the user's company assigned extension / D.I.D. number, ensuring continuous business communication while keeping the user's personal phone number confidential.
