

AWARD WINNING ENERGY SAVING PHONE SOLUTIONS

Bringing Synergy Between
VoIP & Educational Institutions

UniVoIP is an **authorized California Teleconnect Fund (CTF) and E-Rate program provider**, offering award-winning cloud-based phone solutions that bring synergy between Voice over IP (VoIP) communications and educational institutions. UniVoIP enables institutions to **reduce carbon footprint and save up to 62% on power consumption** by replacing antiquated phone systems with modern VoIP solutions.

REDUCE POWER CONSUMPTION

Only one wire needed for both data and voice (wireless options are available) to each workstation or office. No more premise-based PBX.

HOT-DESKING & OFFICE SHARING

Give each user the ability to log on to any phone on the system and immediately gain access to their personal settings and voice mails. Allow multiple users to share the same work-space and accommodate part-time workers.

NO ON SITE TECHNICIAN VISITS

OfficeConnect is a cloud-based phone system. All management including repairs, upgrades or additions is done through an online portal.

TELECOMMUTING & MOBILE WORKERS

Connect to the phone system as a teleworker or via your mobile device. Allow employees to be as productive as in the office when working remotely. Minimize office space requirements while hiring and retaining top talent by allowing them to work from anywhere.
